

# *COURTS ENGINEERING LIMITED*

## **ENVIRONMENTAL POLICY**

We at Courts Engineering Limited recognise our responsibility for environmental matters and we aim to carry out our business in a way that controls and limits the impact we make on the environment, so far as reasonably practicable and economically viable.

We will aim to achieve this by setting clear and defined environmental objectives and targets as part of our wider business plan and to regularly monitor and assess these objectives to ensure we remain committed to, and compliant with, current best practice.

Thus, we at Courts Engineering Limited will endeavour to:

- Comply with all current legislation relating to environmental issues, including relevant Codes Of Practice and Guidance Notes.
- Actively and enthusiastically promote environmental issues within all levels of the business and engage the workforce in relevant training and guidance and seek feedback in return.
- Always look to minimise waste produced by the business, both on site and on our premises. Where waste is unavoidably produced, to dispose of it by recognised and legally compliant methods.
- Actively participate with our Clients' environmental policies in a way that will benefit both our business and our Clients'. We will always look to exceed the minimum requirements.
- Actively seek our own environmental initiatives such as the use of biodiesel in our vehicles and promote these initiatives to our Clients and business partners.
- Recognise the need to continually review and update our policy and implement changes as necessary.

Signed on behalf of Courts Engineering Limited
